

Advanced Energy(R) Highlights High-Voltage Product Line at Electronica 2014

Nov 11, 2014 1:22 AM

Visit Hall A, Booth #121, to Learn How AE UltraVolt(R) High-Voltage Power Supplies Offer Greater Flexibility and Modularity to Power Your Next Innovation

MUNICH, Germany, Nov. 11, 2014 (GLOBE NEWSWIRE) -- Advanced Energy Industries, Inc. (Nasdaq:AEIS) will highlight its UltraVolt high-voltage power supplies at Electronica 2014 this week at Messe München in Munich. The Advanced Energy (AE) high-voltage product line provides precision power to diverse applications such as electronics, X-ray, mass spectrometry, industrial, medical, test and measurement, aerospace and defense, and more.

AE offers over 1500 standard-option UltraVolt power supply models with inherent flexibility and modularity, enabling engineers to precisely match their system specifications and creating infinite uses in high-voltage applications. Each power supply series offers exceptionally wide input and output operating ranges and advanced arc handling, as well as RoHS compliance.

At the show, Advanced Energy will feature:

- * UltraVolt AA high-density, high-voltage power supplies, available 0 to 6 kV at 4, 20 or 30 W
- * UltraVolt HVA precision high-voltage amplifiers, unipolar (0 to 20 kV) and bipolar (0 to ± 20 kV)
- * UltraVolt HP C high-voltage, high-power, cap-charging power supplies, available 0 to 50 kV at 60, 125 and 250 W
- * UltraVolt MicroSize miniature high-voltage power supplies, available 0 to 6 kV up to 6 W

"Our power supplies are versatile and easy to adapt to a variety of applications," said Yuval Wasserman, president and chief executive officer of Advanced Energy. "The products at this year's show should inspire industry leaders, regardless of end application, to push the envelope on innovation. What matters to customers in the high-voltage market is energy density, flexibility and modularity, and our UltraVolt products provide these features across a wide range of voltages and power ranges."

Advanced Energy, through its acquisition of UltraVolt, Inc., and HiTek Power earlier this year, now offers to the market a highly capable and broad range of high-voltage power supplies with standard and custom options-and greater choice from a single, world-class supplier. The combined high-voltage product line provides complete solutions for a range of end-user and OEM applications.

Electronica 2014, the 26(th) International Trade Fair for Electronic Components, Systems and Applications, will take place at Messe München in Munich, Germany, November 11 - 14. To learn more about Advanced Energy UltraVolt products, please visit the company in booth 121, and the company's high-voltage web page at http://www.advanced-energy.com/en/High_Voltage.html.

About Advanced Energy

Advanced Energy (Nasdaq:AEIS) is a global leader in innovative power and control technologies for high-growth, precision power conversion solutions. Advanced Energy is headquartered in Fort Collins, Colorado, with dedicated support and service locations around the world. For more information, go to www.advanced-energy.com.
